Personal

Jerusalem, 14 July, 1954

Dear Mr. Johnston,

I have written you separately and at some length on various matters connected with the water question. I wish in this personal note to give special expression to my appreciation of the constructive spirit and dedication to high purpose which you have manifested in your visits here. The task entrusted to you by the President of the U.S. is complex indeed and one which must tax to the utmost the determination, courage and ingenuity with which you have been blessed in such outstanding measures.

May your vision long continue to sustain you in this as in your other endeavours in the cause of peace and of all those high values on which human progress is based.

With kind regards,
 Sincerely yours,

(-)
 m.s.

Mr. Eric Johnston,
 Washington.
