Press Hamisrad Jerusalem Israel.

Y0082 Eban yesterday lettered following to President Security Council "I've honor to refer my letter 26.9.56 S/3657 in which requested in accordance with established practice of Security Council Israel be given opportunity to take part in discussion by Council of item proposed by France and United Kingdom S/3654 as member state with special interest in question.

In this connection I desire to make clear that intention of Israel delegation is to limit its intervention in discussion solely to aspect of problems which arise of resolution of Security Council 1.9.51 which called upon Egypt "to terminate restrictions in passage of international commercial shipping and goods through Suez Canal whatsoever bound and cease all interference with such shipping beyond that essential to safety of shipping in Canal itself and to observance of international conventions in force". It will be recalled this resolution concluded Security Council discussion regarding this question in which Israel and Egypt were invited to participate."
