After quoting the Egyptian War Ministry statement of the Gaza incident, the Egyptian Embassy statement says:

"This aggression is only another proof of Israel's constant flouting of the clauses of the Armistice Agreement and the provisions of the Charter of the United Nations. Furthermore, the manner in which this unprovoked aggression was carried out shows clearly and without the shadow of a doubt that it was a purposeful plan premeditated by the Israel Government. This is no doubt in pursuit of the execution of the policy notoriously expounded by David Ben Gurion, recently appointed Defence Minister, on the necessity of waging warlike action against the Arab States. There can be no doubt that this premeditated aggression is the inevitable consequence of the Turco-Iraqi Pact, which, by weakening the Arab united front, has accentuated the state of instability in the Middle East.
